EDUCATION

Zagazig University

Bachelor of Computer Science

Zagazig, Egypt

Current Student

EXPERIENCE

Founder & Lead Full Stack Engineer

Jan 2025 – Present

Smart Academy Hub (SaaS Startup)

Remote, Egypt

- Architected and launched a comprehensive **Multi-tenant SaaS platform** using **Laravel 10** and **React.js**, handling subscriptions and analytics for sports academies.
- Engineered a secure tenant isolation system using **Global Scopes** and **Traits**, ensuring 100% data privacy.
- Integrated international payment gateways (**Lemon Squeezy** & **Tap Payments**) via Webhooks to handle recurring subscriptions.
- Designed a gamified **"FIFA-style" Player Evaluation System** with complex frontend logic to visualize stats.
- Optimized system performance for high concurrency using **Redis Queues** for background jobs (emails via Resend API).

Scenario Author & Contributor

Oct 2025 – Present

SadServers.com (Open Source Community)

Remote

- Authored and published technical troubleshooting scenarios (e.g., 'Cairo', 'Alexandria') for the global DevOps community.
- Designed complex Linux infrastructure challenges involving **Docker**, **Nginx**, and system resource management.
- Created educational content to help engineers practice debugging real-world server incidents in a sandboxed environment.

Freelance Full Stack Developer

Nov 2024 – Dec 2024

Interactive Sports Tactical Simulator (GCC Region)

Remote

- Developed a web-based tactical simulation tool for a professional football coach using **React.js** and **HTML5 Canvas**.
- Implemented a responsive drag-and-drop interface for simulating player movements and tactical formations.
- Built a feature to render and export tactical sessions as high-quality images for sharing via WhatsApp.

PROJECTS

Custom Sales CRM | Laravel, MySQL, JavaScript

- Built a specialized CRM featuring a dynamic **Kanban Board** for tracking sales pipelines and lead stages.
- Designed complex Entity-Relationship (ER) diagrams to manage many-to-many relationships between clients and leads.
- Implemented a timeline logging system to track every interaction (calls, meetings) for lead nurturing.

Offline-First Gym Management System | Python, Electron, SQLite

- Developed a desktop application for gyms with limited internet, featuring an embedded local database (SQLite).
- Engineered an offline-first architecture ensuring zero downtime during internet outages.
- Implemented automated logic to track membership validity and generate expiration alerts.

TECHNICAL SKILLS

Languages: PHP (Laravel), JavaScript (React.js), Python, HTML5, CSS3 (Tailwind), SQL (MySQL)

Frameworks: Laravel 10, React.js, Next.js, Electron, Bootstrap, Tailwind CSS

Concepts: SaaS Architecture, Multi-Tenancy, RESTful APIs, OOP, MVC, Design Patterns

Tools & DevOps: Git, Docker Basics, Postman, Linux Administration, Redis, VS Code

ACHIEVEMENTS & CERTIFICATIONS

Certifications: CompTIA Security+, Red Hat System Administration, Linux System Administration (IBM), Malware Analyst Fundamentals, OWASP Top 10.
